

Follow these step-by-step directions, including screen captures, to install the LibX library browser plugin into Firefox.

NOTE: For best results when updating the plugin, disable the previously installed edition before installing an update.

1. Open the Firefox browser, type libx.org into the URL address bar and select “University of Portland Edition” when it is offered.

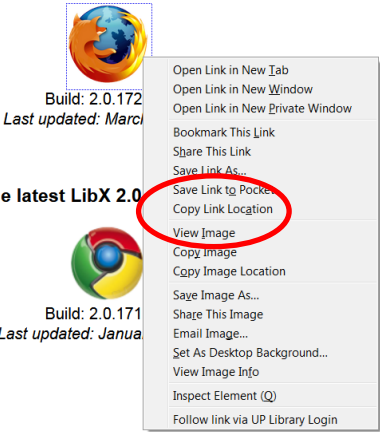

OR

1. Open this [installation link](http://libx.org/releases/) using Firefox (<http://libx.org/releases/>)

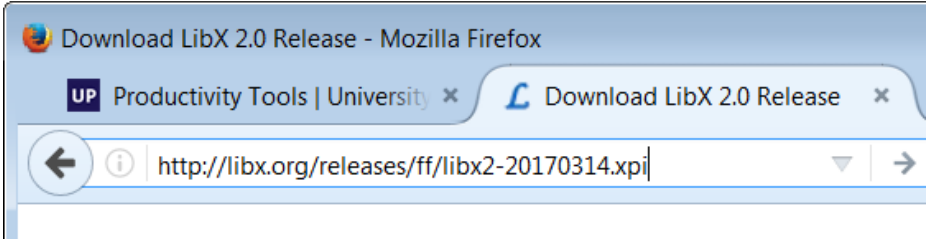

2. Right-click on the Firefox logo and select “Copy Link Location.”

Click to install the latest LibX 2.0 build for Mozilla Firefox

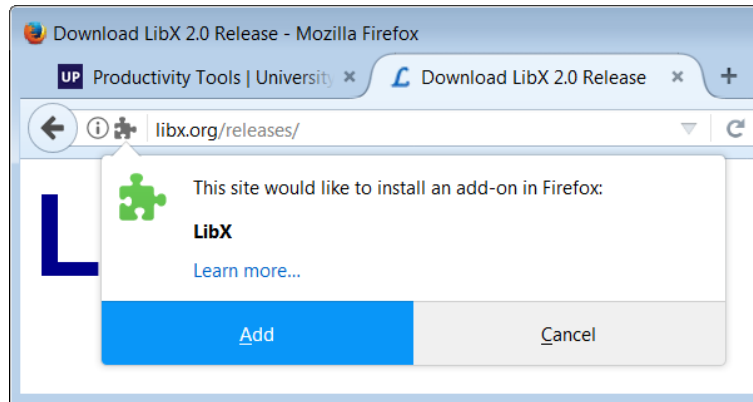

Click to install the latest LibX 2.0

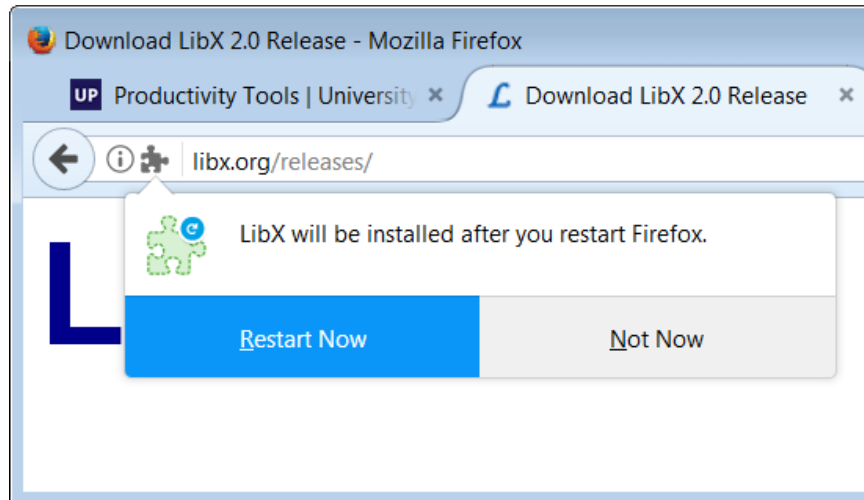

3. Paste the link into the browser’s address bar.

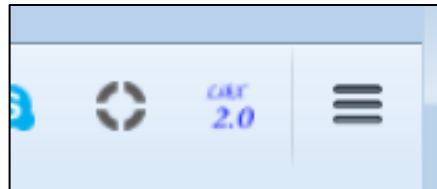

4. Select the **Add** button to allow the installation.

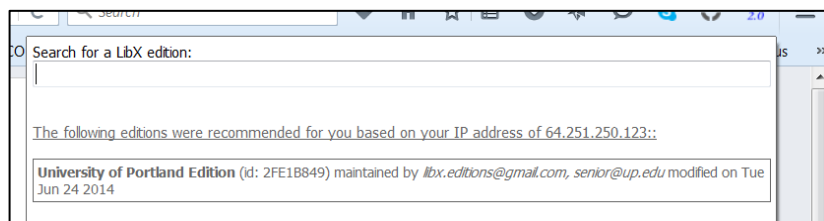

5. Select the **Restart Now** button to restart Firefox.

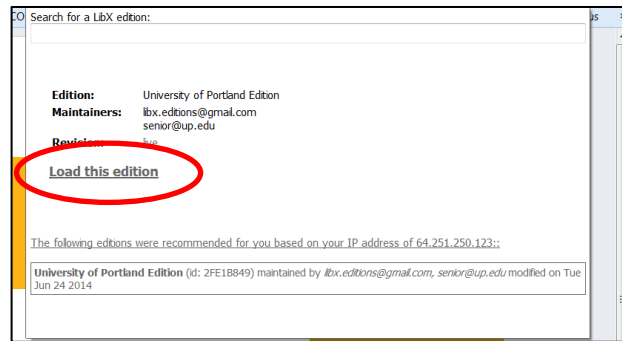

6. Select the “LibX 2.0” icon in the upper right of your Firefox window.

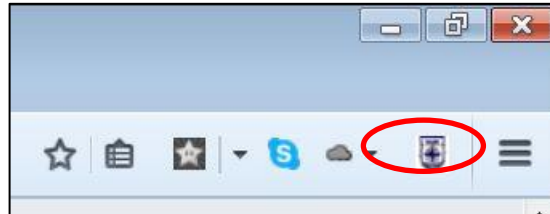

7. Search for “University of Portland” in the LibX edition search box, or if you are on campus, wait a few seconds and the UP edition will be offered to you. Select the box.

8. Select the “Load this edition” link.

9. The UP shield should appear in the upper right corner. Congratulations on successfully installing the LibX library browser plugin!
